

# When Hackers Attack, You Keep Going

Cyber threats are relentless. Downtime isn't an option. You need cybersecurity that goes beyond protection to deliver unbreakable business continuity. The CybX Solution™ protects your critical data, monitors your IT infrastructure in real-time, and ensures rapid recovery so your operations never stop, even when disruption strikes.

## The CybX Solution™ Delivers

Real-time monitoring & continuous telemetry across your entire IT infrastructure.

Data-first protection with quantum-level encryption and data sharding to safeguard your most critical assets.

Single integrated platform including endpoint protection, DNS security, deception deployment, vulnerability management, DLP, and compliance support.

Immutable backup of your critical data to a secure, separate location where it cannot be altered, encrypted, or deleted by attackers.

Designs to fit into existing systems and legacy workflows with minimal disruption.

# The 5 P's Behind Unbreakable Business Continuity

## POLICIES

Our team of experts assist you in defining the objectives and boundaries of your cybersecurity program, and work alongside you to develop and maintain these policies in full alignment with local, state, and federal guidelines.

## PROTECTION

Every piece of technology your organization uses to conduct business is protected. Our solution includes antivirus/anti-ransomware defense, quantum-level dynamic key encryption, and immutable backups that attackers cannot touch.

## POLICING

The CybX Solution™ continuously monitors network activity and records who logged on, when, and from where. You get real-time confidence that your people are doing the right things, and immediate visibility when they're not.

## PROCEDURES

Our team helps you build documented, accessible response procedures covering everything from system restoration and backup recovery to escalation protocols, so action replaces panic.

## PROOF

The CybX Solution™ delivers comprehensive reporting, providing the intelligence you need to understand your security posture in a clear, auditable format that streamlines independent verification.
